

AMENDMENTS TO THE SPECIFICATION:

At page 1, paragraph 1, please insert the following:

**Related Case:**

This is a divisional of U.S. Patent Application Serial No. 09/928,779, filed on August 13, 2001.

At page 13, please replace paragraph [0065] with the following:

[0065] Stabilizing structures (e.g., 250 in FIG. 2a) may be included in the delivery catheter to stabilize the elongated members. For example, the stabilizer may contain two or more legs peripherally placed between an annular wall of a distal segment of the first elongated member and an annular wall of a distal segment of the second and or additional elongated member. Stabilizing structures can be used to keep either the openings and/or the distal segments of the elongated members substantially co-axial or parallel to each other.
